Dear Sir:

Applicant respectfully requests that this Preliminary Amendment be entered prior to examination of the above-identified patent application.

Please amend claim 1 as follows:

1. (Amended) A method for achieving high bit densities in a direct-sequence spread spectrum communication system by using encoded spreading codes, the method comprising the steps of:
- creating a first encoded pseudo-noise code, wherein the first encoded pseudo-noise code corresponds to a value of a signal to be transmitted; and
- spreading a first signal by modulating the first signal with the first encoded pseudo-noise code.
